## Who Is Fatman Fabrications?

Founded by Brent Van Dervort, the company quickly became known in the industry as the "Hot Rod Innovators". Fatman Fabrications grew and began designing, manufacturing, and selling the best suspension parts and frames in the business. Car enthusiasts have been using our products for close to 40 years and have enjoyed top quality since day one.

Brent's General Manager, Tim Tullo, purchased the company and began the next evolution of Fatman Fabrications. Now under Tim's guidance the company has begun the process to refocus the core business and our product line, which will allow us to develop new products and further improve our existing line.

Fatman Fabrications prides itself on being a small, independently owned company with a very talented workforce that work hard to fabricate your parts without sacrificing quality. The employees here are a true asset to the company and our valued customers.

If you are in the area, feel free to stop by for a shop tour Mon-Thurs 8-5. We are located at: 8621-C Fairview Road, Hwy 218, Mint Hill, NC 28227.

# Bolt In Strut Conversion- Ford & Mercury
